ENTRY LEVEL CERTIFICATION COURSES

C-101: Measurement Entry Level: - \$325

Course Name: Radon & Radon Decay Product Measurement

This course prepares you to conduct radon and radon decay product measurements. It is presented in a convenient and comprehensive format that allows you to listen to audio (downloadable MP3 format), review key points with the course manual, and reinforce the information with online quizzes.

Download and streaming – Optional CD format add \$45 (includes shipping)

Course Includes:

- Course Manual
- Audio Interviews and Instruction
- Videos and Resources
- Online Quizzes
- Downloadable Course Certificate

Not available in FL, IL, NJ, OH

C-102: Mitigation Entry Level: - \$475

Course Name: Radon Mitigation Technology

Course for Radon Mitigation **for individuals that have already completed an approved entry level measurement course**. Provides training for installation of radon mitigation systems in a convenient and comprehensive format that allows you to listen to audio (downloadable MP3 format), review key points with the course manual, and reinforce the information with online quizzes. You also receive two days of “hands-on” field training with a mentor arranged by CERTI. If you have not already completed an approved entry level course, see the Mitigation Entry Level – Expanded Version (below).

Download and streaming – Optional CD format add \$45 (includes shipping)

Course Includes:

- Course Manual
- Audio Interviews and Instruction
- Online Quizzes
- Two Day Mentoring
- Downloadable Course Certificate

Not available in FL, IL, NJ, OH, PA

C-103: Mitigation Entry Level – Expanded Version: - \$695

Course Names: Radon & Radon Decay Product Measurement (Measurement) Radon Mitigation Technology (Mitigation)

The measurement and mitigation courses have been combined in one package at a significant discount over prices of courses sold separately. These courses provide all the training you need to become certified for both radon measurement and mitigation. Although you are not required to obtain the radon measurement certification to become certified in mitigation, the measurement course is a prerequisite to the mitigation course provides you with valuable working knowledge for your radon business.

Download and streaming – Optional CD format add \$55 (includes shipping)

Course Includes:

- Course Manual for each course
- Audio Interviews and Instruction
- Videos and Resources
- Online Quizzes for each course
- Two Day Mentoring for Mitigation Course
- Downloadable Course Certificates

Not available in FL, IL, NJ, OH, PA

CANADA ENTRY LEVEL CERTIFICATION COURSES

C-104: Canada Measurement Entry Level: - \$325

Course Name: Radon & Radon Decay Product Measurement

This course prepares you to conduct radon and radon decay product measurements. It is presented in a convenient and comprehensive format that allows you to listen to audio (downloadable MP3 format), review key points with the course manual, and reinforce the information with online quizzes.

Download and streaming only

Course Includes:

- Course Manual
- Audio Interviews and Instruction
- Videos and Resources
- Online Quizzes
- Downloadable Course Certificate

C-105: Canada - Mitigation Entry Level: - \$475

Course Name: Radon Mitigation Technology

Course for Radon Mitigation **for individuals that have already completed an approved entry level measurement course**. Provides training for installation of radon mitigation systems in a convenient and comprehensive format that allows you to listen to audio (downloadable MP3 format), review key points with the course manual, and reinforce the information with online quizzes. You also receive two days of “hands-on” field training with a mentor arranged by CERTI. If you have not already completed an approved entry level course, see the Mitigation Entry Level – Expanded Version (below).

Download and streaming only

Course Includes:

- Course Manual
- Audio Interviews and Instruction
- Online Quizzes
- Two Day Mentoring
- Downloadable Course Certificate

C-106: Canada - Mitigation Entry Level – Expanded Version: - \$695

Course Names: Radon & Radon Decay Product Measurement (Measurement) Radon Mitigation Technology (Mitigation)

The measurement and mitigation courses have been combined in one package at a significant discount over prices of courses sold separately. These courses provide all the training you need to become certified for both radon measurement and mitigation. Although you are not required to obtain the radon measurement certification to become certified in mitigation, the measurement course is a prerequisite to the mitigation course provides you with valuable working knowledge for your radon business.

- Audio Interviews and Instruction
- Videos and Resources
- Online Quizzes for each course
- Two Day Mentoring for Mitigation Course
- Downloadable Course Certificates

GUAM ENTRY LEVEL CERTIFICATION COURSES

C-107: Guam Entry Level Measurement: - \$345

Includes two courses to prepare you for certification to conduct radon measurements on Guam.

1. National Measurement Course - Radon & Radon Decay Product Measurements

This entry level course approved by NEHA-NRPP prepares you to conduct radon and radon decay product measurements and to take the national NEHA-NRPP exam.

Course Includes:

- Audio interviews and instruction
- Online Videos and Resources
- Downloadable Course Manual
- Online Quizzes
- Downloadable Course Certificate

2. Guam Specific Measurement Course

This course is a supplement to the National radon measurement course and is required for being listed with the Guam EPA for conducting radon measurements on Guam.

Course includes:

- Downloadable Course Manual
- Audio and video clips which correspond to each page of the course manual
- Research Paper Reading Assignments & Downloadable Resource Materials
- Online Quizzes
- Downloadable Course Certificate

C-108: Guam Entry Level Mitigation: - \$750

Includes all four courses required to prepare you for certification to conduct radon measurements and mitigation on Guam.

Measurement Courses

- 1. National Measurement Course - Radon & Radon Decay Product Measurements** (course description above)
- 2. Guam Specific Measurement Course** (course description above)

Mitigation Courses

3. National Mitigation Course - Radon Mitigation Technology

This entry level course approved by NEHA-NRPP prepares you to conduct radon mitigation and to take the national NEHA-NRPP exam.

Course Includes:

- Audio interviews and instruction
- Online Videos and Resources
- Downloadable Course Manual
- Online Quizzes
- "hands-on" field exercises with an instructor
- Downloadable Course Certificate

4. Guam Specific Mitigation Course

This course is a supplement to the national mitigation course and is required for being listed with the Guam EPA for conducting radon mitigations on Guam.

Course includes:

- Downloadable Course Manual
- Audio and video clips which correspond to each page of the course manual
- Research Paper Reading Reading Assignments & Downloadable Resource Materials
- Online Quizzes
- Downloadable Course Certificate

Protecting Your Home From Radon (2nd Edition) - \$35

The first edition of this book was written in 1993, to assist what was thought to be an occasional do-it-yourself homeowner. In reality, the number of individuals wanting to reduce radon levels themselves was much higher than anticipated. The overwhelming success of the book led to the distribution of thousands of copies to individuals and libraries. Its popularity identified the need to address the process of hiring contractors and installing passive and active systems in new home construction.

The second edition has these two substantive additions. This detailed manual describes the most common methods for reliably reducing radon in a home. Written in a non-technical format, the book includes step-by-step instructions and illustrations to guide homeowners through the radon mitigation process.

Includes Shipping by Priority Mail (continental US)
